

Alphacool GPU Terminal flat straight - Acetal

Alphacool article number: 12987

Quick Info

The classic orientation of the connection options on the Alphacool graphics card water coolers is vertical. If you prefer a horizontal orientation, you can now make your wish come true with the Alphacool GPU Terminal Flat.

- Flexible connection options
- Horizontal positioning
- Simple installation

Scope of delivery

1x GPU Terminal flat straight - Acetal
3x Screw
2x O-Ring

Technical Data

Dimensions (L x W x H)	92 x 19 x 10.5 mm
Weight	18 g
Material	Acetal
Threads	2 x G1/4"

Manual	12987_Alphacool_GPU_Terminal_flat_straight_-_Acetal_Manual.pdf
Product pictures	12987_Alphacool_GPU_Terminal_flat_straight_-_Acetal_pics.zip

Packaging dimensions per unit

L x W x H	105 x 70 x 38 mm
Weight	368 g

Other data

Certificates	CE, FC, RoHS
EAN	4250197129879
Customs code	84199085900
Guarantee	2 years

Article text

The classic orientation of the connection options on the Alphacool graphics card water coolers is vertical. If you prefer a horizontal orientation, you can now make your wish come true with the Alphacool GPU Terminal Flat. The terminal made of Acetal.

The terminal is only 19 mm wide and fits snugly against the graphics card water cooler. The connectors are far enough apart to provide enough space for the use of connectors with a total diameter of up to 28 mm without them colliding with each other.

The assembly is quite simple. The two O-rings are simply placed in the respective groove on the side of the terminal, which is then placed on the graphics card cooler. The terminal is then placed on the side of the water cooler and mounted with the three screws. The conversion can be done in just a few minutes and can be done by anyone. To be on the safe side, we recommend using the Alphacool pressure tester (Alphacool Leak Testing Tool item number: 17482) for the reassembled block to ensure leak-free water cooling.

Compatibility:

All Alphacool Eisblock Aurora coolers

All Alphacool Core coolers for the RTX 5XXX and AMD RX 9XXX series

Attention

The terminal is **not compatible** with the Alphacool Core coolers of the RTX 4XXX and RX 7XXX series.

Note: Please follow the manual for the correct flow direction of the water.
