

Alphacool Eiszapfen quick release connector kit G1/4 inner thread - Deep Black

Alphacool article number: 17282

Quick Info

Alphacool's new quick couplings called "Icicles" are the next building block in the "Ice" series. High quality and impressive features make every water cooling system a little more valuable and practical!

- Quick and easy to use
- High flow rate maintains

Scope of delivery

1x Alphacool Eiszapfen quick release coupling set

Technical Data

Dimensions (L x D)	64,6 x 23,9mm
Material	Brass
Colour	Deep Black
Thread	2x 1/4" IG
Flow rate reduction (%)	-2,23

Product pictures	17282_Alphacool_Eiszapfen_quick_release_connector_kit_G1-4_inner_thread_-_Deep_Black_pics.zip
EU-DoC / CE / RoHS	Alphacool_EuDoc_CE_RoHS_17282.pdf

Packaging dimensions per unit

L x W x H	86 x 68 x 32 mm
Weight	108 g

Other data

Certificates	CE, FC, RoHS
EAN	4250197172820
Customs code	74198090980

Article text

Alphacool's new quick couplings called "Icicles" are the next building block in the "Ice" series. High quality and impressive features make every water cooling system a little more valuable and practical!

A quick-release coupling is needed wherever expandability, flexibility or cleanliness play a major role. These compact couplings have a 1/4" thread on both sides, making them compatible with all common connections.

These couplings are separated by pulling down the outer ring. Both sides immediately seal completely so that no more water can escape. The special NDSL technology (no drip, no splash, no leak) prevents water from leaking, dripping or splashing out when the cap is opened. When reconnecting, both sides audibly click into each other and seal tightly with a double O-ring, which is simply pressed together when connected. This also prevents the O-ring from wearing out. The mechanism has also been designed for durability to ensure a secure connection even after years.

Many quick couplings also affect the flow. But Alphacool has found a way to solve this problem. These quick couplings maintain a high flow rate!

Alphacool's quick couplings are available in two versions. In deep black and completely chrome-plated, they fit seamlessly into any system.

Note:

The quick couplings should not be used permanently in dry condition, since the O-rings may be too much strain and tightness is no longer guaranteed.

Note on application

Please use only in conjunction with clear transparent water cooling fluids. The particles and additives in Pastel liquids can clog and permanently damage water cooling products such as radiators, pumps, coolers and hoses. This can result in voiding the manufacturer's warranty as well.
