Packaging dimensions per unit

L x W x H	96 x 93 x 35 mm
Weight	145 g

Other data

Certificates	CE, FC, RoHS
EAN	4250197173797
Customs code	74198090980

Article text

All the requirements that a connection has to meet are met here: high flow, shape, workmanship and color. Uncompromising development and production have made the icicles what they are. Two versions are available in brilliant chrome and matte, deep black, which fit perfectly into any system.

Using special processes, the coatings are firmly bonded to the substrate, ensuring the longevity of the intense colors and preventing the coating from flaking. Each connection now also has the Alphacool logo, which makes it unmistakable in addition to its special shape!

The bevelled edges of the union nut press the O-ring very tightly onto the HardTube, making it sit even more securely than in its predecessors. This ensures greater safety during transport.

If you like it colorful, there are three different colored O-rings included. If there is UV lighting, they even glow in the corresponding color.

Design: HardTube screw-on nozzle 16mm

This connection has a 1/4" external thread on one side. HardTubes with an external diameter of 16mm can be screwed on the other side.
