Article text

Alphacool fittings set new standards in terms of design, processing, color scheme, and variety. The remarkably large inner diameter of these fittings more than justifies the name "Highflow".

For every taste

HF HardTube fittings are available in various colors and designs. Alphacool offers the perfect fitting for any application. The product series is perfectly matched and gives every system an individual touch. The combination with Alphacool hoses allows for unlimited creative design possibilities.

Improved chromating process

A new chromating process permanently bonds the intense color of Alphacool fittings with the brass substrate. This ensures that the color does not chip off even after prolonged use. Another highlight is the Alphacool logo on the fittings, underlining the uniqueness of these products.
