Packaging dimensions per unit

L x W x H	810 x 40 x 40 mm
Weight	413 g

Other data

Certificates	CE, FC, RoHS
EAN	4250197184441
Customs code	39172390900

Article text

The HardTube project is becoming a reality. Alphacool is breaking new ground and setting a clear example!

The most commonly used method for water cooling to date has been the normal PVC tubes - now Alphacool offers another method for designing a water cooling system. The HardTube variant brings even more order to the system and gives a much more structured impression.

The acrylic tube can be easily adapted to the system using the appropriate bending tool without having to use additional angle pieces. In order to install the tubes in the system, they must be sawn to the correct length.

Note: Because the pipes are made to fit, the connectors must be pushed on straight with a little force.

Attention: Not compatible with Monsoon Fittings

Available variants:

HardTube 13/10 mm clear acrylic 20 cm, 40 cm, 60 cm and 80 cm (also available as a set of 4)

HardTube 16/13 mm clear acrylic 20 cm, 40 cm, 60 cm and 80 cm (also available as a set of 4)
