## Article text

The Alphacool Universal Feet are ideal for placing radiators externally. The feet easily mount to a radiator, which can then be easily placed on the floor, table, or any other desired location.

### **Stable**

With a length of almost 20 cm, the feet provide a secure stand. The feet are also dampened. There is generous foam padding on the bottom to prevent the transmission of vibrations.

### **Multi-compatible**

The feet are suitable for almost all radiator sizes. The maximum thickness of the radiator including fan can be up to 86 mm. The length of the radiator does not matter. In each set there are two feet that can be mounted independently of each other.
