

## Alphacool Eiszapfen temperature sensor flat G1/4 - chrome

Alphacool article number: 17597

### Quick Info

The Alphacool Eiszapfen temperature sensor flat G1/4" is a simple water temperature sensor that can be easily integrated into any water loop.

- NTC 10 kOhm Thermistor
- 40cm cable length
- almost invisible

### Compatibility

G1/4" female connectors

### Scope of delivery

1 x Alphacool Alphacool Eiszapfen temperature sensor flat G1/4 - chrome

## Technical data

H x D	17mm x 18mm
Material	brass
Color	chrome
Cable length	40cm
Connection	2-Pin
Thermistor	NTC 10 kOhm
Thread	G1/4" IT
Thread length	5mm
Total screw-in depth	13mm

## Download links

Product pictures	<a href="#">17597_Alphacool_Eiszapfen_temperature_sensor_flat_G1-4_-_chrome_pics.zip</a>
------------------	--

## Packaging dimensions per unit

L x W x H	205 x 165 x 20 mm
Weight	22 g

## Other data

Certificates	CE, FC, RoHS
EAN	4250197175975
Customs code	84733080000

## Article text

The Alphacool Eiszapfen temperature sensor flat G1/4" is a simple water temperature sensor that can be easily integrated into any water loop.

### Integration made easy

The temperature sensor is very compact and can be integrated into any water circuit due to its G1/4" external thread. It is simply screwed into the corresponding G1/4" connection at any position in the water loop. Due to the small screw-in depth, it is compatible with all Alphacool products with a free G1/4" connection.

### Sensor

A classic NTC 10 kOhm thermistor is used as sensor. The readable temperature range is between -40 and 125°C. The cable is 40 cm long and leads into a typical 2-pin connector. Many mainboards now offer direct connection options for such sensors. Please check the manual of your mainboard. Of course there are also several external controllers that offer a connector for the sensor.

### Design

The design is very simple so that the temperature sensor can be installed almost invisible in the system.
