

CORE 2 TUBE RESERVOIR

The new Core 2 Tube Reservoir from Alphacool is a real eye-catcher. The slim design impresses not only with the shine of the real glass cylinder, but also with the typical Core elements, such as the connectors made of chrome-plated brass. The rotating mounting bracket allows for flexible positioning in the case. The large opening for filling and venting is a feature that simplifies the installation and maintenance of the PC water cooling system.

SLEEK DESIGN AND STURDY CONSTRUCTION

GLASS UNLEASHES.

Features:

- Real glass cylinder
- 1/4" chrome plated brass threads
- D5/VPP compatible
- Large opening for filling/venting
- Flexible positioning due to rotatable mounting bracket
- Cable guide
